U.S. EXPORT SALES

- Outstanding Export Sales
(Unshipped Balances)
On July 20, 1975
- Export shipments in
Current Marketing Year
- Daily Sales reported
July 21 - 29, 1975

-- As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

EXPORT SALES REPORT

Comments on release of July 31, 1975 (based on reports from exporters during the week ending **July 20**, unless otherwise noted):

SOVIET GRAIN PURCHASES: During the period July 21-29, Canada announced the sale of 1.0 million metric tons (MT) of Durum wheat to the USSR, for November 1975-August 1976 shipment. This brings Canada's announced wheat sales to the USSR for 1975/76 shipment to 3.0 million MT. Announced Soviet grain purchases from the U.S. as of July 29 now total 4.2 million MT of wheat for July-1975-September 1976 shipment (including 3 million MT optional origin), 4.5 million MT of corn for October 1975-August 1976 shipment (all optional origin), and 1.1 million MT of barley (all optional origin). It is considered likely that 500,000 tons of the barley purchased will be shipped from France or Canada and U.S. corn substituted for the balance of 600,000 MT.

Together with the previously announced purchase of 750,000 MT of wheat from Australia, and 200,000 MT of wheat for 1975/76 shipment and 200,000 MT of corn for October 1975-September 1976 shipment from the U.S. carried over from 1974/75, Soviet grain purchases for shipment by September 1976 now total 13.95 million MT. Total 1975/76 Soviet grain consumption of about 210 million MT is expected to exceed its total grain production of 185 million MT by approximately 25 million MT. The 11 million MT gap not yet covered by foreign purchases must be met by increased livestock slaughter to reduce the use of grain in feed, a drawdown of stocks, further import purchases, or a combination of these options. It is considered likely that the USSR will use all three.

Wheat: The apparent export commitment (cumulative exports plus outstanding sales) for 1975/76 increased by 1.59 million MT with a sharp increase in the commitment to the USSR of 993,600 MT. Optional origin sales to the USSR climbed from zero last week to 1.5 million MT this week. Commitments to the European Community (EC) increased by 145,500 MT, and commitments to Japan and East Germany increased by 138,600 MT and 120,700 MT, respectively.

Sales reported under the daily reporting system during the period July 21-29 indicates the purchase of 101,600 MT by East Germany for September-October 1975 delivery.

Feedgrains: Total corn commitments for 1974/75 rose by 285,500 MT, with an increase to the EC of 95,500 MT and to Portugal of 56,000 MT being the major changes. Total sorghum commitments increased by 5,600 MT with minor changes to several destinations.

For 1975/76 shipment, total corn commitments increased by 830,800 MT to a total of 4.1 million MT. Corn commitments to unknown destinations jumped by 343,400 MT, while commitments to the EC and Japan increased by 235,700 MT and 167,700 MT, respectively.

Sales reported under the daily reporting system during the period July 21-29 for shipment in 1975/76 indicate corn sales of 203,200 MT to East Germany, 150,800 MT to West Germany and 101,600 MT to the Netherlands.

Rice: The apparent export commitment for 1974/75 rose by 16,900 MT, with minor changes to a few destinations.

Soybeans: The apparent export commitment for 1974/75 declined by 33,000 MT as exports rose to 278,000 MT. Outstanding sales for delivery in 1975/76 increased by 591,000 MT. During the period July 21 - July 29, sales of 262,145 MT to unknown destinations were reported under the daily reporting system for delivery November 1975 - April 1976. Weather reports from sunflower growing areas of the European USSR indicate ripening has been 15 to 20 days earlier than usual. USDA currently places Soviet sunflowerseed production within a range of 5.8 - 6.8 million MT, well below production and procurement plans. Gross production as low as 5.8 million MT might require soybean imports of as much as 1 million MT. On the other hand, if Soviet sunflowerseed should reach the upper part of the range, it would approach the limits of processing capacity in the USSR.

Soybean Meal: The apparent export commitment for 1974/75 declined by 165,000 MT, primarily because of the cancellation of sales to the EC, Poland, and unknown destinations. Exports rose to 62,400 MT largely on shipments to the EC (29,000 MT), Czechoslovakia (9,300 MT), Spain (5,500 MT), Canada (5,300 MT), and unknown destinations (11,200 MT). The Bureau of the Census reported June exports at 287,000 MT, closely reflecting the projection published July 3. Based on the first 3 weeks of July during which exports totaled 179,400 MT, total July shipments may again fall slightly below 300,000 MT.

Soybean Oil: The apparent export commitment declined by 4,300 MT, as exports rose to 9,700 MT, including 8,600 MT shipped to Iran. Census reported that exports (which include shipments under Title II, PL 480) through October 1974-June 1975 totaled 425,000 MT, only 75,000 MT below the USDA estimate of 500,000 MT (1.1 billion lbs.) during 1974/75.

Cotton: Exports totaled 71,000 running bales (RB), with the largest amounts going to Korea (27,000 RB) and Japan (13,000 RB). This brings total exports during 1974/75 to 3.6 million RB. With only 11 days left in 1974/75, exports should just about equal the USDA estimate of 3.7 million bales. The apparent export commitment for 1974/75 decreased by 5,000 bales with both new sales and cancellation at a low level. Sales for 1975/76 shipment increased by 11,000 RB and now stand at 748,000 RB. Trade sources report some return of confidence recently in the international course count yarn trade. Increased forward sales by South Brazilian and Pakistani spinners were noted and several Far Eastern importing countries are in the market for raw materials because of more active sales of course count yarns, particularly open-end spun types.

HOW THE WEEKLY "U.S. EXPORT SALES" PUBLICATION IS COMPILED

Under Section 812 of the Agricultural Act of 1970 which was added by the Agriculture and Consumer Protection Act of 1973, U.S. exporters of wheat, and wheat flour, feed grains, oilseeds, cotton, rice and related products are required to submit to the Department weekly reports of their export sales and exports of these commodities. Since mid-October 1974, the Export Sales Division, Foreign Agricultural Service has been responsible for receiving, processing and publishing weekly reports compiled from reports submitted by individual exporters. The purpose of the weekly publication, "U.S. Export Sales", is to inform the public and Government officials of export sales activity on the covered commodities.

Following is a description of what happens to exporters' individual reports from the time they are received until the data is published in compilation form in the weekly "U.S. Export Sales" publication.

Security - Data received from individual exporters as well as summary data prior to its release are handled confidentially by the Foreign Agricultural Service. During working hours, constant vigil is maintained over these records. After working hours, they are kept in security files in locked rooms. Only designated personnel have possession of room keys.

Personnel having access to the reports and the data are bound by statute, as well as USDA and FAS regulations to keep these reports confidential. Each has personally signed a certificate acknowledging an understanding of these requirements and an agreement to abide by them.

Receipt of Reports - Generally, each Monday, U.S. exporters mail reports of their outstanding export sales and related transactions for the Monday through Sunday reporting week. These reports --submitted on forms described in detail in the Export Sales Reporting Instructions--come to the Monitoring Branch. By Tuesday, the first reports start trickling in and most of them are logged in by Friday. On Friday, tardy exporters are contacted and their data is taken by phone to assure full coverage in the weekly report to be published the following Thursday.

To illustrate the volume handled in producing the weekly U.S. Export Sales report, an average of 260 exporters report each week, of which 95 are exporters of grain, 75 of oilseeds and products, 75 of cotton and 15 of rice. Collectively, they contribute some 5,200 documents that must be processed weekly.

Processing Reports - As the reports are received, by mail, messenger, and phone, they are reviewed for accuracy and completeness prior to conversion to card punch for computer editing. Mathematical and other errors, such as improper commodity or country codes, prompt an immediate phone call to the exporter for explanation or correction. By Friday, all reports should have been received, verified and double key-punched on cards ready to be fed into the computer in order to produce the various print-outs used in compiling the final report.

Activity within the Division builds up on Monday morning when the first computer summary print-out, called the "balance sheet", is drawn from the computer. It shows beginning outstanding sales balances, positive changes (increases), negative changes (decreases) and new balances. It is reviewed for possible problems, and corrective action is taken before further summaries are ordered from the computer.

Assuming the balance sheet is in order, additional print-outs listing details of sales and other activity by exporter, country and region are obtained early on Tuesday. After an accuracy review, they are used to type tables showing outstanding export sales and exports by commodity normally shown on pages 1 and 2 of the report and the table summarizing the current week's transactions generally shown on page 3.

Final Review - On Wednesday morning, Export Sales Division staff members meet for a final review of that week's data. During this review, significant changes such as, large sales, cancellations, etc. are discussed to determine (1) if data is complete and accurate and (2) if information of special interest should be reported to Department officials or should be highlighted in the comments which normally appear in the inside front cover.

Printing, Release and Distribution - On Wednesday afternoon, the computer camera copy (which makes up the majority of the published report), along with manually typed pages are sent to the Department's Office of Operations, which works through the night and into the next day printing and assembling the report. By 3:00 p.m. on Thursday, the report is available for public release. Copies are made available to the Press Section of the Department for use by the wire services. Approximately 2,000 copies are sent to those on the mailing list for the publication. Recipients include other U.S. Government agencies, the media and private individuals.
